We started using the Data Business System, Signature Series, in April of 1996. It has been a great system and easy to use.

The system needed correct is available.

Data Business Systems inquire to answer special into contact these.

May 10, 1996

To Whom It May Concern:

This letter is on behalf of John Calicchio, Data Business Systems. John was recommended to our firm by one of our current employees, who was formerly employed by John and spoke very highly of him. We were in the process of upgrading our current network from Lantastic to Novell Network, because of numerous problems we had encountered over the years using the Lantastic Network.

John has been a life saver to our company. We previously had coaxial cabling, an old Irwin 80 tape back up, a very badly botched up Lantastic Network, and additional computers hooked up to our network that were not even necessary. We now have the entire office wired with twisted pair cabling, a new file server, a solid Novell Network, 4-Gig tape back up, 28.8 modems, and workstation battery back ups. Needless to say, we are very pleased with the service and equipment we have received from John.

I am pleased to recommend John to any future client.

Sincerely,
Tamra McVey
